MicroStrategy Developer: Reporting Essentials

Objetivos Gerais:

This course provides students with an overview of the extensive reporting capabilities of MicroStrategy Developer. Participants leave with an understanding of report creation and the numerous data and style report manipulations in MicroStrategy Developer, including auto-style creation, drilling, data pivoting, page-by, outline mode, grid and graph formatting, and thresholds.

Additionally, participants become versed in the creation of basic components that are essential in the creation of reports, including report filters, metrics, MicroStrategy OLAP Services features, prompts, and searches. Students also discover report design principles that leverage the capabilities of MicroStrategy Developer.

All lectures are reinforced with hands-on exercises.

MicroStrategy Developer was known as MicroStrategy Desktop in version 9.3.1 and prior versions.
